

Week 4: Deployment Plan

Report Link: https://app.powerbi.com/links/Q08e0lir2X?ctid=56c1d497-700b-49cf-8f8d-3dd6b20d522f&pbi_source=linkShare

Final Report: Used Power BI Service to publish the report for users, created workspaces and deployment pipeline for version control.

Dev Environment: Report are built and tested by us before sharing.

Lineage View: A visual map that shows where the data comes from, how it flows through datasets, and which reports or dashboards depend on it.

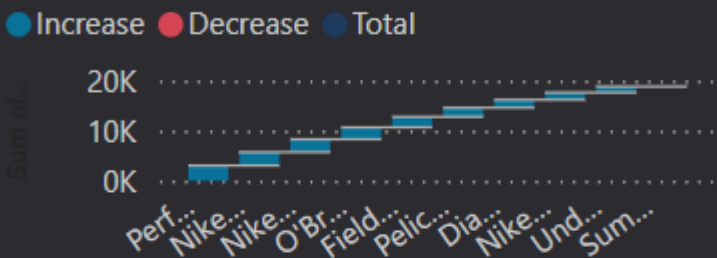

The screenshot displays the Microsoft Fabric workspace interface. The top navigation bar includes the 'Fabric' logo, a search bar, and a 'Power BI trial: 59 days left' notification. The workspace name 'evostra_workspace_dev' is prominently displayed, along with a 'Development' environment tag. A sidebar on the left provides navigation options: Home, Workspaces, Copilot, OneLake catalog, Monitor, Real-Time, and Workloads. The main content area shows a data pipeline with four components connected sequentially: 1. 'Text/CSV' data source (DataCoSupplyChainDataset.csv) with a gateway connected to the data source. 2. 'dataco smart supply chain project' semantic model (refreshed 24/4/26, 12:03:24 am). 3. 'dataco smart supply chain project' report (1 Viewer, 6 Views). 4. 'Dataco Supply Chain Dashboard' dashboard (1 Viewer, 1 View). The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 01:07 on 24-04-2026.
